www.seiind.com

ABOUT US

To Build, maintain and perpetuate a loyal and continuing relationship with every customer through total commitment to quality, timely completion, mutual trust, competitive cost, transparent dealings. Thereby enhancing the values for money to our esteemed Customers.

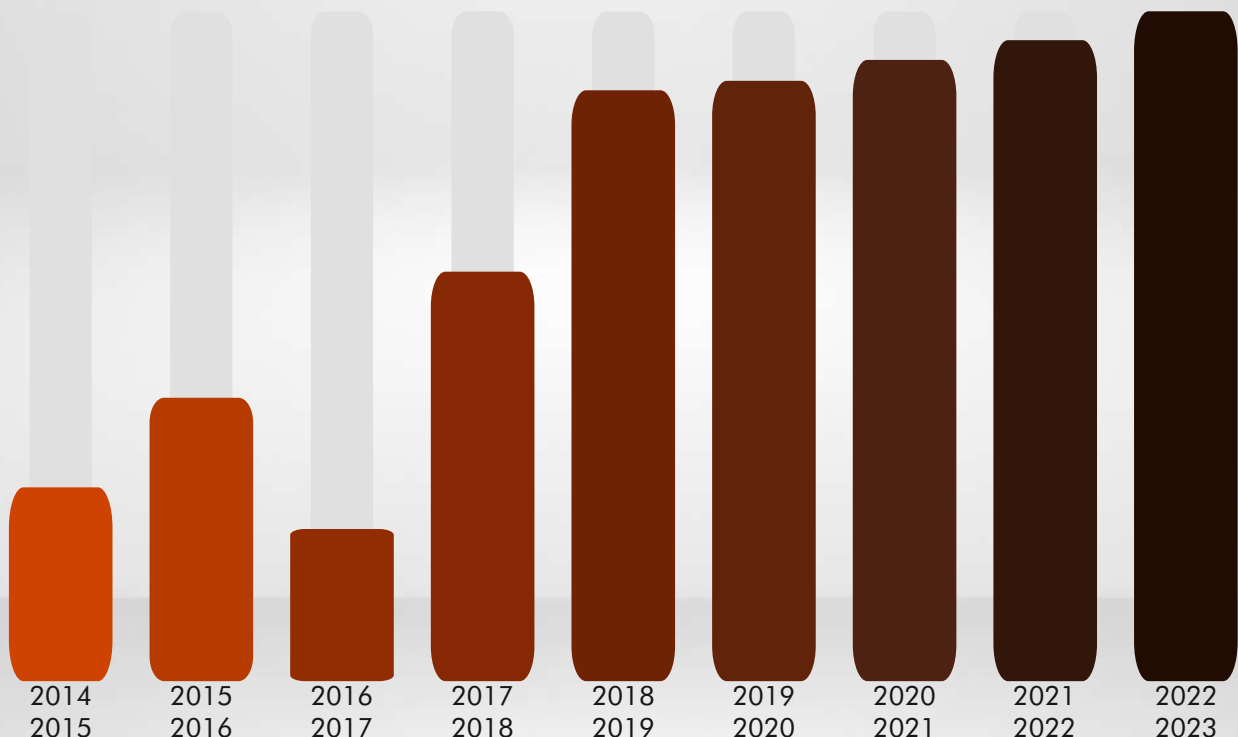

In the year 2004-2005 this company "**SHAH ELECTRICAL INDUSTRIES**" was started under the guidance of **Mr. ASHOK R KASHIWALA (FOUNDER)**.

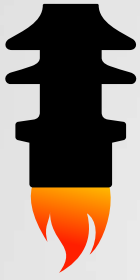

Shah Electrical Industries in short "SEI" is a unit located in Vadodra, Gujarat, India, having an area of 700sqmt. and total work space of 1400sqmt. We are having a good collection of skilled, technical, commercial and hardworking dedicated personals.

This company has been making a significant name in the field of Instrument transformers since last one and a half decade with the help of highly qualified and efficient trained personnel.

Our Company has diversified its product offerings and operations throughout its journey to become one of the market capturing company in the domestic field and now trying to reach the International boundaries.

MISSION

Our mission is to bring modern transformer with compact sizes and ease in handling to satisfy our customer need. As our customers are all leaders in their own industry, We are rising our potential to meet their requirements, which is all SEI all about.

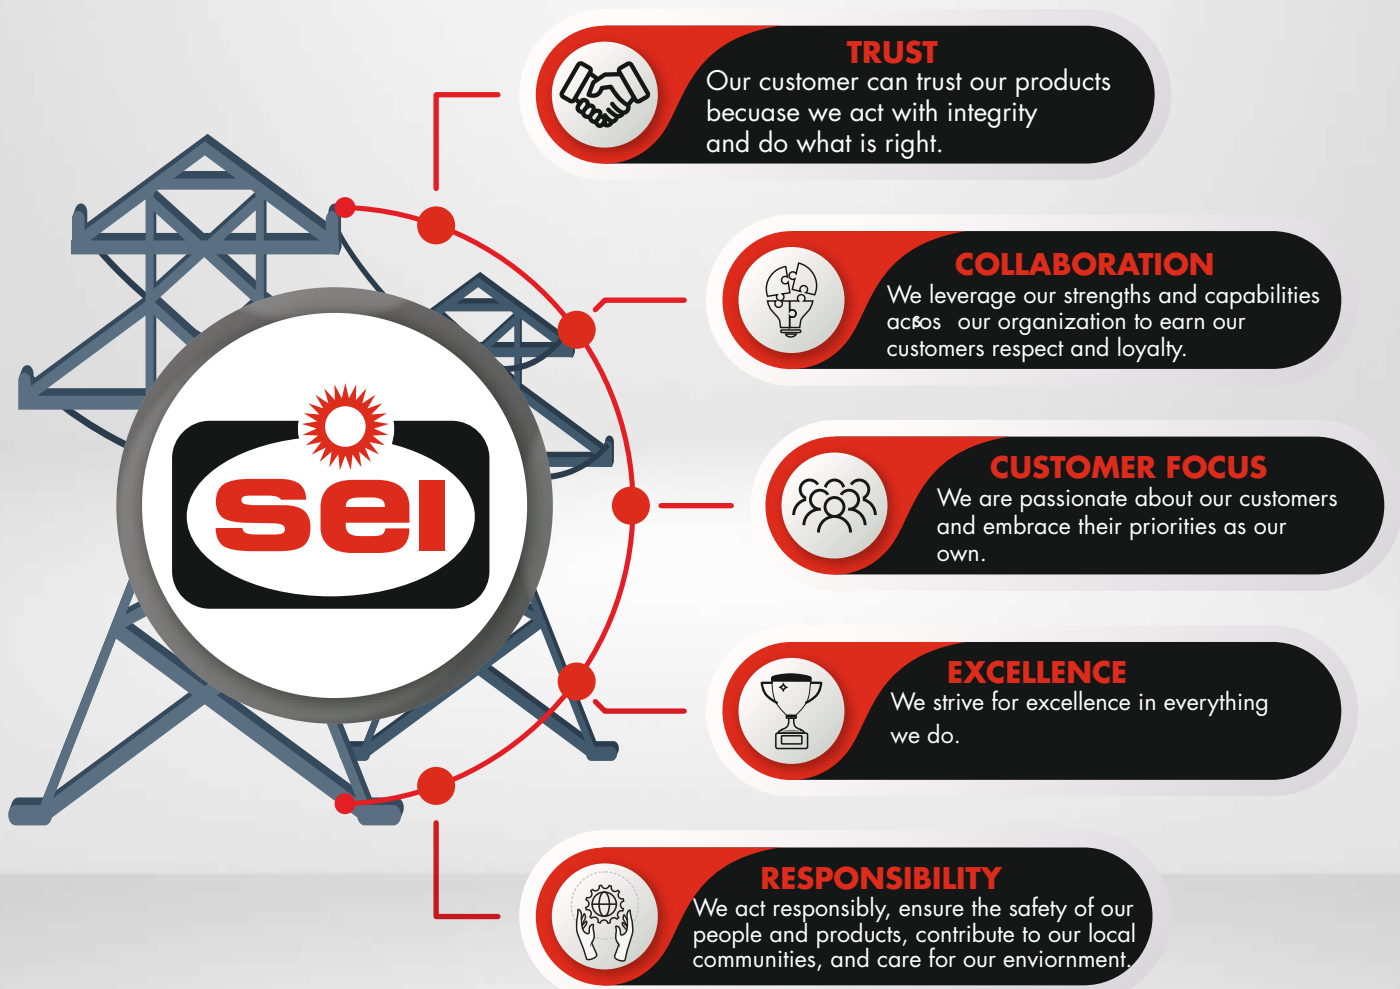

Apart from the routine manufacturing items 'SEI' is also investing into new development, research in the field of transformers to optimize the cost.

Also we are planning to penetrate in to the International market with a team of professionals.

Our objective is to achieve sustained profitable growth with commitment to total customer satisfaction by supplying consistent high quality product at globally competitive prices through employee participation in cross functional teams and strive for continuous improvement in TOTAL QUALITY, PRODUCTIVITY AND COST.
